## Who are the potential members?

#### LEGAL ENTITY

- Legal Entity established in an ECSO country (EU Member State or an EEA / EFTA country or an H2020 associated country)
- A public body from an ECSO Country

#### MEMBERS CATEGORIES

- **Large companies:** developing and/or manufacturing cybersecurity solutions / services providers;
- **National and European Organisation / Associations:** representing interests at national or European / International level.
- **SMEs:** Associations composed only by SME, Start-ups, Incubators, Accelerators.
- **Users / Operators** National public administrations or private companies (large or SMEs) directly represented.
- **Regional / Local public administrations:** Regional / Local Clusters of public / private Legal Entities with local economic / ecosystem development interests.
- **Public Administrations** at national level.
- **Research Centers,** Academia / Universities; Associations composed only by Research Centers, Academia or Universities.
- **Others** (financing bodies, insurances, consultants, etc.).

# Education and Human Factors

## Working Group 5

### VISION

Contributing to the cybersecurity capability, capacity-building, and resilience of the next generation (NextGen) of digital Europe.

### MISSION AND OBJECTIVES

The working group focuses on the following issues:

**Education & skills:** Skills verification, minimum curricula and industry cooperation (universities), Youth4Cyber (education modules ages 6-26), including the most appropriate tools and learning methods to develop applicable capability, such as cyber ranges.

**Training/operational competences:** EHR4CYBER (HR/jobs), building up a cybersecurity training and exercise ecosystem, as well as a European Cyber Range Community.

**Awareness/cyber hygiene/gender inclusiveness:** Women4Cyber Foundation's national chapters, role model campaigns, etc., collaboration on awareness campaigns with EU institutions/Agencies, etc.

**Human factors:** Link with citizens and civil society on aspects related to ethics, privacy, awareness, fight against cyber-crime, and societal impact.

### ONGOING WORK

Gather the cyber range community and showcase cyber ranges in Europe through a Call to Action and the organisation of workshops for different target groups.

**University/Higher Education level:** Develop minimum curricula guidelines for cybersecurity courses for university, higher education and professional training providers.

**School level:** Implement Youth4Cyber modules at national level with the support of Members. International cooperation with ITU is under discussion. Advocate skills verification through the "Top 10 abilities" initiative (which skills are needed for specific tasks or scenarios) and contribute to the development of a European cybersecurity skills framework (ENISA ad-hoc WG).

**Support HR/recruitment efforts in cybersecurity** and work on implementing a job/competence platform.

**Transversal activity linked to wider marketing/communications effort:** Raise awareness on basic cyber hygiene & cybersecurity solutions (through ECSO's Awareness Calendar) and support EU and Members' awareness initiatives

### KEY PEOPLE

## WG5 Group Chairs

**Almerindo Graziano**  
Silensec

**Csaba Virág**  
Talgen

**Paresh Rathod**
