#8 Binare

Binare.io is a prominent Finnish startup, a cybersecurity spin-off from University of Jyvaskyla.
Catering numerous (I)IoT/connected verticals, it develops a unique and flagship SaaS/on-premise platform for (I)IoT cybersecurity - focusing on device firmware analysis (assessment, reporting), SBOM recovery/generation, SBOM software decay monitoring/alerting, automation of (I)IoT pre-certification (ioXt, UL2900, ETSI303645), and component licensing analysis.
The platform works on binaries, does not require source code hence, protecting customers' valuable IPR.
 The founding/leadership team includes pioneers of Firmware-Analysis-as-a-Service, recognized international (I)IoT cybersecurity experts in academic/industrial worlds.

#9 Breachlock

↪

Founded in 2019, BreachLock, Inc. is recognized as a global leader in the cybersecurity industry, specializing in scalable and comprehensive Penetration Testing as a Service (PTaaS). As a cloud-native innovator, BreachLock delivers market-disrupting PTaaS by leveraging the power of AI to scale the skill and creativity of human Penetration Testers, giving enterprises complete security posture visibility from an adversary perspective. BreachLock's human Penetration Testers validate vulnerabilities discovered by AI and uncover vulnerabilities that automation cannot find. BreachLock is the world's first full-stack Penetration Testing solution, covering all attack surfaces such as Web Applications, Internal & External Networks, Mobile Applications, and API Endpoints. BreachLock is on a mission to Make Cyberspace a Safe Place.
