EUROPEAN CYBER SECURITY ORGANISATION

Cybersecurity Awareness Calendar 2024

June
Supply Chain

Turning up Neon Lights for Awareness Nights!

ECS

EUROPEAN CYBER SECURITY ORGANISATION

ECSO aims to spread awareness of key aspects of cybersecurity and showcase ECSO Members and the cybersecurity community's solutions and services.

Introducing our 2024 topics:

January: Zero Trust
February: Quantum Computing and Cryptography
March: Ransomware
April: Cybersecurity Solutions to Secure SME Businesses
May: The Road to a Career in cyber
June: Supply Chain
July: European Regulations and Compliance
August: Generative AI
September: Internet Of Things (IOT)
October: Artificial Intelligence
November: Threat Vulnerability
December: Cloud Computing

Building Resilient Supply Chains

ISC2

Vulnerable supply chains have become prominent security concerns for cybersecurity professionals. ISC2 is helping professionals navigate their supply chain risk management challenges.

ISC Insights - Peer-written articles explore supply chain risk management from multiple vantage points. Learn more.

ISC2 Skill Builder Courses

- **First Steps for Supply Chain Security**
Learn the importance of mapping your supply chain as a means to control risk at your organization.
Learn more.

- **Supply Chain Security**
Learn strategies for developing a systematic approach to assessing and mitigating supply chain risks.

Strengthening Cybersecurity Resilience in the Supply Chain

HWG Sababa

When primary targets are hard to reach, cybercriminals often turn to the weakest links in the supply chain to infiltrate more robust systems indirectly. To counter this, the upcoming NIS 2 Directive mandates entities to implement strong cybersecurity risk management measures. These measures must cover technical, operational, and organizational aspects, ensuring security not just within individual organizations, but throughout the entire supply chain and all supplier relationships.
Learn more HERE.

BLINDSPOT to Redefine the Fundamental Approach to Supply Chain Security of Organizations Globally

PRODAFT
BLINDSPOT

BLINDSPOT is a supply chain risk prevention platform that enables companies to monitor their exposure to cyberattacks in real time. Allowing them to understand their organisational risks based on contemporary incidents and adversarial planning, they can mitigate any threat before it turns into a full-blown ransomware attack. Instead of dealing with hefty security breaches, the platform gives organizations the unique ability to prevent supply chain attacks and ensure seamless compliance with the NIS2 Directive.
